About Me

With 2+ years in IT, I specialize in UI development for Angular-based web apps. Proficient in HTML, CSS, Bootstrap, JavaScript, and TypeScript, I ensure cross-browser compatibility and thorough code coverage. I also streamline workflows using automation tools like GitHub.

Work Experience

march 2022- Present

Webfort Technology

Query Manager

- The Query Manager project provides an automated response and ticketing solution for Employee Compliance queries.
- Uses the bank's technology stack and a collaborative Agile approach.
- Reduced query resolution time by 50%, improving customer satisfaction.

Roles & Responsibilities

- Implemented responsive design with Angular and Bootstrap.
- Developed reusable UI components for consistency.
- Engineered robust services to support UI.
- Prioritized clean, logical code.
- Ensured high code quality through rigorous testing.
- Managed deployment activities for seamless releases.
- Stayed updated with industry trends.
- Collaborated effectively with teams.
- Optimized frontend performance.
